Table of contents

Streszczenie **9**

Summary **10**

1. Introduction **11**

2. Mobile robots and their usage **12**

2.1. Review of mobile robots 12
2.2. Implementation of mobility of mobile robots 12

3. Stability **14**

3.1. Introduction 14
3.2. Types of stability 14
3.3. Asymptotic stability 15
3.4. Marginal Stability 17
3.5. Instability 18

4. The diversity of the environment in which mobile robots operate **19**

5. The holonomics and nonholonomics in mobile robots **21**

6. The energy problem in mobile robots **23**

7. The autonomy in mobile robots **25**

8. The nonlinearity in modelling of the mobile robots **26**

9. Aim and scope of the work **27**

9.1. Aim of the work 27
9.2. Scope of the work 27

10. The wheeled mobile robots **29**

10.1. Mono-wheel mobile robots 29
10.1.1. Overview of the mono-wheel robots 29
10.1.2. Mathematical description of the mono-wheel robots 31
10.1.3. Mechatronic description of the mono-wheel robot 37
10.1.3.1. Mechanical structure 37
10.1.3.2. Electronic structure 39
10.1.3.3. Simulation 40
10.1.3.4. Control system implementation 42

10.1.4. Prototype testing....45
10.1.5. Conclusions....47
10.2. 2-wheeled mobile robots....48
10.2.1. Overview of the 2-wheeled mobile robots....48
10.2.2. Mathematical description of the 2-wheeled mobile robots....48
10.2.2.1. Kinematics description of the 2-wheeled mobile robots....48
10.2.2.2. Dynamics description of the 2-wheeled mobile robots....54
10.2.2.3. Identification of the dynamic motion equations for the 2-wheeled mobile robots....60
10.2.3. Mathematical description of the robot's motion....60
10.2.4. Navigation of the mobile robots....62
10.2.4.1. Introduction....62
10.2.4.2. Self-localization and pathplanning....65
10.2.5. Mechatronic description of the 2-wheeled mobile robots....73
10.2.6. Prototype testing....75
10.2.7. Proposal for a rapid prototyping environment for algorithms intended for autonomous mobile robot control....77
10.2.7.1. Introduction....77
10.2.7.2. AMIGOBOT mobile robot....78
10.2.7.2.1. ARIA and AMIGOSH software....80
10.2.7.2.2. Communication with a group of mobile robots....81
10.2.7.2.3. Software architecture....82
10.2.7.3. Development of the prototyping environment....83
10.2.7.4. Verification of the proposed solution....85
10.2.7.5. Conclusions....88
10.2.8. The group of 2-wheeled mobile robots....89
10.2.8.1. Overview of the groups of robots....89
10.2.8.2. The precise odometry navigation for the group of robots....91
10.2.8.2.1. Introduction....91
10.2.8.2.2. The model of computational formulation....92
10.2.8.2.3. The motion model....93
10.2.8.2.4. The multi-robot motion model....95
10.2.8.2.5. Observation model....95
10.2.8.2.6. Extended Kalman filter....96
10.2.8.2.7. Test rigs based on algorithms implementation....97
10.2.8.3. Conclusions....105
10.2.9. Control of a robots' formation in unknown surroundings environment....105
10.2.9.1. Introduction....105

10.2.9.2. AMIGOBOT mobile robots sensors description 105
10.2.9.3. Hierarchical control unit 106
10.2.9.4. Hierarchical control system 107
10.2.9.5. Control of the robots formation 110
10.2.9.6. Verification of the results 112

11. Use of the mobile robots for inspection tasks 115

11.1. Moving-frame mobile robots 116
11.1.1. Overview of moving-frame mobile robots 116
11.1.2. Mathematical description of the moving-frame robots 117
11.1.2.1. Dynamics description 117
11.1.2.1.1. Simulation 121
11.1.2.2. Kinematics description 125
11.1.2.2.1. Simulation 125
11.1.3. Conclusions 127
11.2. Fixed track mobile robots 128
11.2.1. Overview of the track configuration systems 128
11.2.2. Kinematics description of the track mobile robots 129
11.2.2.1. Slip of the track 132
11.2.2.2. Kinematics of turning 133
11.2.2.3. Numerical verification of the kinematics model 136
11.2.2.4. Conclusions 140
11.2.3. Dynamic description of the track mobile robots 140
11.2.3.1. Simulation on the basis of the robot description 141
11.2.3.2. Conclusions 143
11.3. The controllable track configuration mobile robots 144
11.3.1. Overview of the controllable track configuration systems 144
11.3.2. Driving mechanism 145
11.3.3. Geometrical restrictions 146
11.3.4. Testing of Inuktun Microtracs in real environment 149
11.3.5. Simulation of Inuktun Microtracks in Abaqus software 151

12. Summary and final conclusions 153

12.1. Individual achievements included in the book 153
12.2. The Author's contribution in the field of the mobile robots 154
12.3. Prospect of further work 155
