| Preface | 5 |
| 1. Characteristic functions of stochastic vibrations | 11 |
| 1.1. Introduction..... | 11 |
| 1.2. Characteristic functions of stochastic vibrations..... | 13 |
| 2. Stationarity of damped stochastic vibrations | 23 |
| 2.1. Introduction..... | 23 |
| 2.2. Stationarity of damped stochastic vibrations..... | 24 |
| 2.3. Ergodicity of damped stochastic vibrations | 26 |
| 2.4. Stochastic moments of damped vibrations | 30 |
| 2.5. Stochastic moments and derivatives of characteristic functions | 31 |
| 3. Applications to vibratory systems | 34 |
| 3.1. Damped oscillator..... | 34 |
| 3.2. Oscillator without damping..... | 40 |
| 3.3. Damped string | 42 |
| 4. Computer simulations | 44 |
| 4.1. Introduction..... | 44 |
| 4.2. Parameters and description of simulations | 48 |
| 4.2.1. Simulations for $\lambda = 10$ | 51 |
| 4.2.2. Simulations for $\lambda = 10^3$ | 56 |
| 4.2.3. Simulations for $\lambda = 10^4$ | 60 |
| 4.3. Statistical investigations | 64 |
| 4.3.1. Histograms for $\lambda = 10$ | 65 |
| 4.3.2. Histograms for $\lambda = 10^3$ | 69 |
| 4.3.3. Histograms for $\lambda = 10^4$ | 73 |
| 4.3.3. Histograms for high damping | 78 |
| 4.4. Remarks and conclusions | 83 |
| Appendix | 103 |
| Literature | 120 |
