Summary	7
Streszczenie	8
List of symbols	11
1. Introduction	13
2. Analysis of coupled transmission lines	19
2.1. Capacitance matrix of coupled lines	20
2.2. Even and Odd modes of symmetrical coupled lines	21
2.3. Four-port symmetrical network	23
2.4. Directional couplers	26
2.4.1. Forward-wave directional couplers.....	30
2.4.2. Backward-wave directional couplers	32
2.4.3. Asymmetric coupled lines	34
2.5. Summary	40
3. Improved FD method for numerical calculation of the coupled line parameters	41
3.1. FD method for coupled-line parameters calculation	42
3.2. Accelerating algorithm for FD method	46
3.3. Improved FD method with unequal mesh.....	49
3.4. Multiconductor coupled-line section analysis with the use of improved FD method and application examples.....	52
3.5. Summary	57
4. Design aspects of high-performance coupled-line circuits	58
4.1. Conditions of ideal coupled-line section realization	59
4.1.1. Analysis of influence of modal phase velocity inequality on directional coupler's parameters	59
4.1.2. Influence of coupling coefficient inequality on directional coupler parameters	63

4.2. Coupled-line section compensation techniques	66
4.2.1. Compensation of coupling coefficients by the choice of dielectric layers	66
4.2.2. Compensation of coupling coefficients using capacitive and inductive elements	75
4.2.3. Compensation of coupling coefficients using corrugated ground plane	97
4.2.4. Wiggly line couplers	99
4.3. Parasitic reactances within coupled-line structures	101
4.3.1. Influence of parasitic reactances of the transition regions between coupled and signal lines	102
4.3.2. Influence of parasitic reactances of the transition regions between coupled-line sections	105
4.3.3. Compensation method of parasitic reactances	107
4.4. Summary	118
5. Directional couplers designed with the use of the developed techniques and their circuit applications	120
5.1. Single-section 3-dB directional coupler designed in symmetric stripline coupled lines	121
5.2. Single-section 3-dB directional coupler in microstrip multilayer technology	122
5.3. Broadband multisection, asymmetric 3-dB directional coupler	127
5.4. Broadband multisection, symmetrical 3-dB directional coupler	128
5.5. Broadband multisection, asymmetric 8.34 dB directional coupler	130
5.6. Three-section 3-dB, symmetrical directional coupler designed in multilayer microstrip technology	135
5.7. Suspended stripline directional coupler with equalized inductive and capacitive coupling coefficients	142
5.8. Low-loss, suspended stripline directional coupler with equalized inductive and capacitive coupling coefficients	143
5.9. Low-loss multisection suspended stripline directional coupler	146
5.10. Broadband high-performance coupled-line magic-T network for direction finding systems	150
5.11. Integrated stripline multibeam antenna array fed by a compact Butler matrix	155
5.12. Summary	158
6. Final remarks	160
Appendix I	162
Appendix II	166
