Preface	7
Chapter 1. Modal Synthesis of the Sound of a Rattle	9
1.1. Introduction and the Object of the Research	9
1.2. Historical Background	11
1.3. Sound of Virtual Musical Instruments	14
1.4. First Step of a Numerical Reconstruction – Modal Analysis of a Rattle	14
1.5. Second Step of a Numerical Reconstruction – Sound Synthesis of a Rattle	20
1.6. Concluding remarks	21
Bibliography	22
Chapter 2. The Studies on Sound Absorption of Perforated Panels	24
2.1. Introduction	24
2.2. Experimental Setup	27
2.3. Results and Discussion	29
2.3.1. Absorption Coefficient	29
2.3.2. Vibroacoustic Interaction	32
2.4. Conclusions	34
Bibliography	35
Chapter 3. Diagnosis of the Drive System with the Usage of Vibrothermography Technologies	37
3.1. Introduction	37
3.2. Usage of Thermovision in Diagnostic of Gears	38
3.3. Laboratory Examinations	40
3.4. Analysis of RMS Value of Vibration Acceleration	43
3.5. Analysis of Infrared Diagnostic	45
3.6. Conclusions	49
Bibliography	49
Chapter 4. Scalable Finite Element Solver Implementation for Linearised Euler Equations	52
4.1. Introduction	52
4.2. Linearised Euler Equations	53
4.2.1. Variational Formulation	54
4.2.2. Boundary Conditions	55

4.3. Numerical Workflow	57
4.3.1. Finite Element Method in FEniCS	57
4.3.2. Discretisation in Time	57
4.4. Simulations	58
4.5. Results and Discussion	59
4.6. Conclusions	64
Acknowledgements	64
Bibliography	64
Chapter 5. Music That Wasn't There? Milestones and Minor Setbacks in Early Blues and Jazz Phonography	67
5.1. Phonograph vs Turntable: The Era of Acoustic Phonography	67
5.2. Loud – Louder – Jazz!	69
5.3. Microphone Revolution: “Electric” Recording	73
5.4. Is It Really Blues? From Stylisation to Musical Roots	74
5.5. Three and a Half Minutes: Capacity of Sound Carriers	75
5.6. Absolute Audio Memory: Field Recordings and Bootlegs	76
5.7. Sculpting Sound: Tapes and Tape Recorders	77
5.8. Conclusion	78
Bibliography	80
Chapter 6. Analytical and Numerical Study of Spatial Irregularity of Sound Field in Coupled Rooms	82
6.1. Introduction	82
6.2. Theoretical Analysis	83
6.2.1. Low-Frequency Room Response	83
6.2.2. Quantification of Spatial Irregularity of Sound Pressure Field	85
6.3. Numerical Study	87
6.3.1. Room System under Consideration	87
6.3.2. Eigenfunctions and Eigenfrequencies	87
6.3.3. Modal Density	90
6.3.4. Mean Spatial Deviation of Sound Pressure Level	92
6.4. Summary and Conclusions	95
Acknowledgments	96
Bibliography	96
Chapter 7. Analysis of Vibroacoustic Interactions in Workplaces of a Large Machine in an Industrial Hall	98
7.1. Introduction	98
7.2. Case Study of the Furnace for Glass Hardening	99
7.3. Measurements of Noise and Vibrations	100
7.4. Noise at Workplaces	101
7.5. Vibrations on Operators' Workplaces	103
7.6. Analysis of Measurements and Results Discussion	104
7.7. Summary	106
Acknowledgments	106
Bibliography	106
Chapter 8. Ear Training Aimed at Pitch Intonation and Tuning Systems: Problems and Solutions	108
8.1. Introduction	108

8.2.	Precise Pitch-Tuning in Ear Training	109
8.2.1.	Considerations on the Choice of Tools	111
8.3.	Generator	112
8.3.1.	Synthesizers	112
8.3.2.	Tested Sounds	114
8.3.3.	Test of Pitch Control Capability	115
8.3.4.	Test Results	116
8.4.	Detector	118
8.4.1.	PureData Pitch Estimator	118
8.4.2.	Test of Pitch Estimation Capability	118
8.4.3.	Test Results	119
8.5.	Conclusions	120
	Bibliography	120
Chapter 9. On the Modelling of the Aeroacoustics Phenomena Generated by Axial Fan		122
9.1.	Modelling of Turbulent Flows	122
9.2.	Acoustic Model	123
9.3.	The Object of the Study	125
9.4.	Numerical Calculations and Results	126
9.5.	Summary	130
	Bibliography	131
Chapter 10. The Usage of Various String Plucking Mechanisms to Simulate a Human Playing the Guitar		132
10.1.	Introduction	132
10.2.	Upper Limb Mechanics	133
10.3.	Robots Configuration	136
10.4.	Research Stand and Methodology	139
10.5.	Results	140
10.6.	Conclusions	144
	Bibliography	145
Chapter 11. Acoustic Analysis of the Internal Combustion Engine Depending on the Type of Fuel Supply and Engine Load		146
11.1.	Introduction	146
11.2.	Plan of the Experiment	147
11.3.	Conclusions	154
	Acknowledgements	155
	Bibliography	155
